

## WRITING CENTER

### Writing Consultation

The Writing Center offers assistance with reading, writing and communication projects through in-person, online, and phone conferences. We work with all students in all programs. Our mission is to help students become stronger, more confident writers and communicators.

Students can meet with consultants at any stage of a project, such as understanding readings and assignments, brainstorming topics, evaluating evidence, and revising. We also help students prepare for multi-modal projects including in-class presentations and poster sessions.

Conferences are 25 minutes long, though students are welcome to sign up for two consecutive conferences.

## COMMUNITY-BASED LEARNING & RESEARCH

The Office of Community-Based Learning and Research seeks to provide high-quality learning experiences which integrate in-class knowledge and meaningful engagement within community institutions. We seek to connect faculty research agendas and student learning to the needs of the community and foster long-term relationships with regional, national, and international organizations. Our goal is to encourage pedagogically sound, community-based learning among and across programs at UW Bothell.

The Office of Community-Based Learning and Research also consults with faculty in developing courses and selecting appropriate community partners. We also provide presentations to classes on how to begin service projects.
