The MAP-Works survey was sent to first year students on October 11th. The survey assesses how students feel about their transition to UW Bothell and to college life and provides feedback on their Mandatory Advising Appointments this quarter. First year students will complete the MAP-Works survey and review their results. It is CUSP’s goal to use MAP-Works in conjunction with advising appointments to ensure students are familiar with campus resources and are on a track to a successful academic start.
