First Year Nursing RN to BSN Academic Requirements and Procedures.

Maintain satisfactory academic and testing progress as follows:
1. Cumulative GPA of 2.85 your first five quarters at UWB.
3. Minimum GPA of 2.0 in each UW Bothell course.
5. Cumulative GPA of 3.0 in each quarter of the EvCC Nursing Program.
6. Awarding of the Associate Degree in Nursing from EvCC Nursing Program.
7. Receive at least a 59th percentile in the NLN PAX Exam on the first attempt (one attempt only).
8. Pass the Washington State RN-NCLEX no later than two quarter after completing of the Associate Degree in Nursing.

Academic and Testing Policies:
1. If any of the academic requirements are not met, the student is no longer eligible to remain in the program as a pre-admitted EvCC Nursing and UWB RN to BSN student; rather the student will need to compete for admissions into Everett Nursing Program or any other associate degree nursing program and then back into the RN to BSN degree program at UW Bothell. Petitions may be submitted for requirements one and two. Contact Advising Services process information and form.
2. Course-repeats are not an option given the cohort model and the timeline to enter the nursing program at Everett Community College.
3. Courses must be equivalent to the required curriculum. For example, a Small Group Communication course cannot be substituted for the required Interpersonal Communication course; they are not equivalent in subject matter.
4. If a student does not meet the degree program requirements, yet is in good academic standing with the University, they retain their general admissions status as a pre-major student.

Academic monitoring the first five quarters at UW Bothell:
1. During the first five quarters, a student that earns a cumulative or quarterly GPA that falls below 3.0 will be sent a letter of concern/warning by the BSN academic advisor and asked to make an appointment with the academic advisor.
2. At the end of a student’s first academic year, the BSN nursing admission committee meets to discuss the progress of all students in the degree program. If deemed needed, a letter of concern/warning will be mailed to the student.
3. A student who does not meet any one of the nursing program standards or academic, testing, and licensing requirements as outlined by each institution are subject to disciplinary actions which may include removal from the degree program.
4. A student removed from the degree program, but who remains in good academic standing with the University, retains their general admission status and are moved to pre-major status.
