Executive Summary of Your Proposal
Please provide a concise overview of the program, activity, or service for which you seek funding.

Since Autumn Quarter 2011 the Graduate Advisory Committee has been advising the Vice Chancellor for Academic Affairs on ways to enhance the educational experiences of graduate students at UW Bothell. The initial focus has been the development of the new Graduate Commons, which will serve as a hub for graduate student life, enhancing academic, research and social interactions.

The Commons, housed on the first floor of the Truly House, will be a space that graduate students from all UW Bothell departments can use on a drop-in basis for individual work, collaboration, relaxation, informal networking, and small-group meetings. The facility has already been brought to a minimal level of readiness, but in order to create an environment that is conducive to its intended functionality, additional furniture and equipment are needed. Furthermore, although the Commons will not necessitate full-time monitoring during open hours, a .025 FTE Commons Manager position is needed for general restocking, straightening, and minor problem-solving.

Need for this Program/Service
In 150 words or less, please describe the need for this program or service. Please include any data that might support your proposal (e.g., the number of students who have participated in your service or program in the past). If your program is currently funded by SAF, please indicate how you have used the money to help your organization meet its goal(s).

The Graduate Commons is an important part of the campus-wide effort to build a thriving, productive graduate culture. The UW Bothell campus has not had a cross-programmatic facility for graduate students even though graduate students and faculty have long requested one. Given that a portion of the Truly House has been made available for this purpose, the funding is needed to maximize the potential of the space.

How do you plan to assess the program or service?
How do you plan to track the effects of this program or service?
For example, how would track how the event/program/service went? How would you track how successful it was and what you could change in the future?

Program evaluation will be conducted by analyzing responses to formal surveys, administered annually, and by analyzing usage patterns, available through swipe-card logs. The surveys will inform possible changes to amenities and infrastructure, and the swipe-card data will inform possible changes to hours of operations.

Estimate number of students that will benefit from your proposed program/service
In 150 words or less, estimate how many currently enrolled students will likely benefit from your proposed service or program. Please estimate the number of other individuals (and indicate their affiliation) that might benefit from this service or program. Finally, please indicate other sources of financial support.

UW Bothell currently has over 400 graduate students across the Business, Computing and Software Systems, Interdisciplinary Arts and Sciences, Education, and Nursing programs, and all of these students will benefit from the Commons. Undergraduate students will generally not have access to the space, but exceptions will be made for those working directly on collaborative projects with graduate students. Faculty and staff will generally not have access to the space, but informal, non-recurring meetings with graduate students will be allowed. At this time there is no known source of funding aside from SAF.
Benefits to Participants
In 150 words or less, please describe the benefits that participants are likely to gain by attending or participating in this program or service.

Graduate students from all UW Bothell departments can use the Graduate Commons on a drop-in basis for individual work, collaboration, relaxation, informal networking, and small-group meetings. The space will have comfortable seating for relaxation, work areas that promote collaboration and exchange, wi-fi internet access, a fridge and microwave so that graduate students can store and prepare food, a coffee pot and hot water heater, a cold water dispenser, and other amenities that support the intended functionality of the space.
