UW Bothell Application  
Applied Computing / Computer Science & Software Engineering

Please limit response to 2-pages, double-space, 12-point font

**Personal Statement Prompt:**

We want to learn more about you and your plans for the University of Washington Bothell education and beyond. Why are you interested in computer science, and specifically UW Bothell's CSS Program?

If you are applying to the Applied Computing major, discuss what required minor, second major, or other customized area of study you plan to complete along with your degree.

Do you have any experience in software or hardware development outside of the classroom? If so, please describe.

The computing field relies on communication and collaboration. Further we believe diverse collaborations create better solutions. How do you plan to work with a diverse group of students, and what diverse perspectives will you bring?

If you have applied before, what has changed since your previous application? If you have repeated courses, or overcome significant obstacles, please explain.
