UW Bothell Application
Computer Engineering

Personal Statement Prompt

We want to learn more about you and your plans for University of Washington Bothell education and beyond. Why are you interested in computer engineering, and specifically a program at UW Bothell? What talents and skills will you bring as part of our community of scholars?

Do you have any experience in software or hardware development outside of the classroom? If so, please describe.

What interests and activities outside of computer science do you have (such as involvement in student organizations, volunteer work, employment, etc.)?

If you have applied before, what has changed since your previous application? If you have repeated courses, or overcome significant obstacles, please explain.
