Student Inclusive Campus Survey 2015: Nursing Results

Overview

The Student Inclusive Campus Survey was conducted during the spring quarter 2014-2015 focused on campus inclusiveness and diversity, one of our 21st Century Campus Initiative priorities. All University of Washington Bothell students were invited to participate. The survey was created by the Director of Diversity, the Office of Institutional Research, and the Diversity Council. The results will be used to inform a campus diversity action plan.

Data

Student Inclusive Campus Survey 2015 – Nursing Only

- 56 Total Respondents (447 email invitations were sent with multiple reminders)
 - 13% Email Response Rate
- 41 Completed Entire Survey
 - 73% Completion Rate

Limitations

As with any attempt to the inclusive campus survey it is important to name and contextualize the limitations of the instrument. First, it should be noted that this response rate, while within an acceptable range for an online survey, still fell below typical response rate averages for the UW Bothell campus. This is not uncommon when surveys are focused on a particular area. In surveys with lower response rates it is particularly important to understand the representativeness of the survey across available categories of interest. For most of the areas checked (School, URM status, Sex...) the proportion of survey respondents closely mapped to the representation of those groups on the UW Bothell campus.

Categories and Definitions

While categorization of respondents into subgroups is always a challenge, it is particularly important to note these challenges within a context of a survey with an explicit focus on diversity. Subgroups are typically used in surveys to surface opinions that may otherwise be hidden in summary averages. Selecting categories is often a balance between providing the greatest possible accuracy while also keeping numbers aggregated at a level large enough that results can be reported out for a group without compromising anonymity. Other important considerations include the length of the survey (with the goal of keeping it as short as possible) and potential consequences having self-categorization frame responses. As with all new surveys, categories were vetted with the surveys subject-area owner (in this case, the Office of Diversity) and feedback continues to be sought on how best to improve them.

Where possible we eliminated demographic questions from the survey to reduce its length. The one exception was a question related to gender recommended by the Diversity Committee with the intent to surface a wider variety of sponsors responses then allowed in the University of Washington's binary male/female codification of Sex. While the question provided helpful contextual information for our campus, the low response rate to the question relatively low number of responses in categories outside of male/female (which would have restricted the ability to break into subgroups in order to protect anonymity), we made the decision to provide breakouts based on the University of Washington's self-reported Sex classifications to ensure that his many voices as possible were heard.

In addition to reducing survey length and removing a potential source of bias or stress for the respondent, University of Washington data is also used because data is typically available for all respondents and definitions are standard across the three campuses as well as typically a line with federal categorization. Using these externally verified definitions also allows us to make comparisons external surveys if necessary.

Definitions are provided below for context:

Student Race. The federal government requires the UW to collect information about students' race according to the following categories. A) American Indian or Alaska Native: A person having origins in any of the original peoples of North and South America (including Central America), and who maintains a tribal affiliation or community attachment. B) Asian: A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. C) Black or African American: A person having origins in any of the Black racial groups of Africa. D) Native Hawaiian or Other Pacific Islander: A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. E) White: A person having origins in any of the original peoples of Europe, the Middle East, or North Africa. A student can select as many race categories as he or she identifies with.

Student Race-Ethnicity. The federal government requires the UW to report on Student Race and Student Ethnicity in combination, in the following seven categories: A) Hispanic/Latino of any race; and, for individuals who are non-Hispanic/Latino only, B) American Indian or Alaska Native, C) Asian, C) Black or African American, D) Native Hawaiian or Other Pacific Islander, E) White, and F) Two or more races (students who have identified with more than one of the groups listed under B through E).

Underrepresented Minority (URM) Status. A student is classified as having Underrepresented Minority (URM) Status if that student identifies with either: a Hispanic/Latino ethnicity, OR one or more of the following racial groups: Hawaiian/Pacific Islander, American Indian, or African-American,

International Student. An individual who is not a citizen or permanent resident of the U.S. and is enrolled in one or more courses at the UW.

Sex. Self-reported sex of student.

Pell Eligible Student. The federal Pell grant program provides need-based grants to low-income undergraduate and certain post-baccalaureate students to promote access to postsecondary education. Eligibility for the program is set by the US Department of Education and based on information a student provides in his or her Free Application for Federal Student Aid (FAFSA). Pell grant eligibility is often used as a proxy for students' socioeconomic status.
