Construction Activities

As the project team prepares to mobilize on site, early construction activities are scheduled to start on October 4th. These activities include pumping of the existing detention pond, mobilizing baker tanks for temporary liquid containment and installing Temporary Erosion and Sediment Control (TESC) measures. Power from the existing dormitories to be demolished will be disconnected and existing water and sewer will be cut and capped. Furthermore, clearing and grubbing will commence on site, in preparation for the arrival of construction trailers which will be located on the South side of 185th Street. In efforts to ensure public safety, the construction team will also install temporary sidewalks on the Southwest corner of Husky Village.

If you have any questions about the upcoming work on the UW Bothell campus regarding the UW Bothell New Residential Village Student Housing Redevelopment project, please feel free to contact us and we would be glad to provide any additional information.
