March 2022

UWB-Cascadia College
STEM 4 Project
18330 110th Ave NE
Bothell, WA 98011

What is happening on the Bothell STEM4 Project:

Utility crews have completed installation of the East storm sewer connection, which ties into the existing campus system.

The Sanitary Sewer line bore has been completed (bore pit photos below). This bore connects the east end of the project site to the existing sanitary sewer system down on Campus Way. Boring equipment has been de-mobilized and restoration of the receiving pit & tie-in on Campus Way be completed the week of the 28th.

This Community Bulletin is intended to serve as an update for upcoming work related to the Bothell STEM 4 project, as well as a means of notifying our campus community of any significant events that may impact the sidewalks and streets surrounding the project.

Restoration of the West Garage landscaping is taking place this week. This area was previously disturbed while installing the permanent power service to the site.
Continuation of the concrete strike has prevented any further structure progress. The team was able to procure a few short load concrete deliveries to complete the elevator pit, which will allow for SOG prep to be completed. This puts the project in a good position to be ready for SOG placement once concrete is available.
