OPENING DOORS TO NURSING EDUCATION FOR FIRST YEAR UNIVERSITY STUDENTS

If you are a graduating high school senior ready to earn your Bachelor of Science in Nursing degree immediately following high school graduation, consider applying for the First Year Nursing RN to BSN degree program; a Bachelor of Science in Nursing degree.

Designed specifically for incoming university first-year (freshmen), the program is based on a joint partnership between the UW Bothell School of Nursing and Health Studies and the Everett Community College Nursing program; two long standing nursing education programs that are filling the state’s need for highly qualified professionals.
THE FIRST YEAR ENTRY RN TO BSN PROGRAM requires off-campus study, is full-time and has a set schedule of coursework which includes the first year or nursing prerequisites. Students earn two degrees by attending both UW Bothell for the Bachelor of Science in Nursing and the partner school of Everett Community College to earn an Associate in Nursing degree through the RN Program. This model allows students to participate in nursing clinicals in sophomore year, prepare for RN licensure in junior year, and collaborate with nurses from across the region and globe in senior year.

ADMISSIONS REVIEW

Factors taken into consideration for admission into this major include: gained exposure to healthcare and/or human services-related activities over a sustained period of time; references; GPA; academic preparation in high school for a science-based nursing education; well-developed university personal and nursing goal statements; and the completion of healthcare-related programs or coursework.

OVERVIEW OF ADMISSION REQUIREMENTS FOR THE UNIVERSITY AND NURSING MAJOR:

APPLICATION DEADLINE: JANUARY 15.

For complete details see www.bothell.washington.edu/fyebsn

- A completed UW Bothell First-Year Application (freshman) for First Year Entry RN to BSN
