Executive Summary of Your Proposal

Please provide a concise overview of the program, activity, or service for which you seek funding.

We are a joint campus, University of Washington Bothell and Cascadia Community College student organization. As student leaders and ambassadors, our mission is to act as facilitators, promoters, and educators regarding sustainable practices. This includes ideas, information, initiatives, and projects on campus and within the surrounding communities. We are building a network that provides opportunities for interested parties to get involved and connect with each other regarding sustainability.

Sustainability is one of the seven core principles at UWB. Our organization actively plans and conducts important educational events to further this mission in our student body. We hold monthly events to bring personal sustainability to each and every student at both UWB and CCC, thereby building upon our sense of community that we feel makes this campus so special.

Need for this Program/Service

In 150 words or less, please describe the need for this program or service. Please include any data that might support your proposal (e.g., the number of students who have participated in your service or program in the past). If your program is currently funded by SAF, please indicate how you have used the money to help your organization meet its goal(s).

There is not other group or organization working on sustainability issues at UWB. Keeping this core principle alive in our student body relies upon our visibility and activity, which also relies upon the resources available to us.

How do you plan to assess the program or service?

How do you plan to track the effects of this program or service?

For example, how would track how the event/program/service went? How would you track how successful it was and what you could change in the future?

We regularly hold meetings and events. We are constantly debriefing and revising our events and meetings to bring more people into this community of sustainability. We do this by building partnerships with local nonprofit organizations and municipalities. We currently have strong connections to the City of Bothell and several local 501c3 organizations who assist us in creating strong student programs and events on campus such as Earth Day, Make a Difference Day, What's Up With Your Stuff?, Earth Hour, various Habitat Restoration events, Movie Showings, and educational workshops, such as "22 ways to be more sustainable in your everyday life."

Estimate number of students that will benefit from your proposed program/service

In 150 words or less, estimate how many currently enrolled students will likely benefit from your proposed service or program. Please estimate the number of other individuals (and indicate their affiliation) that might benefit from this service or program. Finally, please indicate other sources of financial support.

We hope to bring all students into the Sustainability Organization sphere through the year by programming a variety of events that appeal the vast diversity of peoples and disciplines at our campus. For example, we will be engaging business students next Earth Week to make the event more financially sustainable, and perhaps encourage a group of students to present on business sustainability at the event. Ultimately we hope to keep our group dynamic and engaging enough to attract a wide variety of people to attend and participate in our

broad sustainable mission. A mission that includes all facets of sustainability, not just environmental sustainability.

Benefits to Participants

In 150 words or less, please describe the benefits that participants are likely to gain by attending or participating in this program or service.

With an eroding sense of sustainability and accountability in modern consumerist culture, we believe we can be the impetus for system wide change by creating sustainably mindful citizens and leaders through our example and efforts.
