

Student Technology Fee Request for Funding

Project Title – Computer Quick Workstations

-

Brief Project Overview

-

The Director of Information Systems wants to set up 10 more Computer Quick Workstations 5 in UW1 for student breakout areas and 5 in UW2. These computers are meant to allow students to have quick access to the internet while waiting for their classes.

Full description of the project that includes the following sections:

A. The goal of the program or project

The goal is to allow students quick access to the Internet.

B. A description of the program and how it will benefit the student body

Often students can not go to the various computer labs on campus quick enough to check their email while waiting for their class so these Computer Quick Workstations will provide that service. Especially in the UW2 building there are no open computer labs in the UW2 building for students.

C. Specific information about the equipment and/or services being requested

Need to purchase:

- Computer stands (on wheels, so they can be moved to other locations, if needed). These stands are going to be of two kinds so we can provide handicapped students with this service too.
- Cables and locks for securing the computer and screens
- Stools for students to sit on

Requesting funds for setting up 10 Computer Quick Workstations that include desks, stools and a locking security system.

Amount requested for 10 Computer Quick Workstations is: \$8,000

The Director of Information Systems has confirmed that maintaining these stations won't be so hard and his department can handle the workload. He also agreed to provide us with used computers that no longer are going to be used at computer labs. This way the cost of this project won't be as much and implementing it would be easy.

Items to be purchased were found at this website: www.officeworld.com

D. How the project will be implemented and by whom

- The Director of Information Systems will be implementing this project and providing the computers and software.

- Physical plant needs to approve this proposal and secure the Quick Workstations.
