

Student Technology Fee Request for Funding

Project Title

- Digital Photography for the Education Program

Brief Project Overview

- Digital photography is now commonly used across the curriculum in K-12 classrooms, in projects ranging from writing projects, to blogging, to the creation of digital videos about historic events. Purchase of digital photography equipment for the Education Program would support students' development of professional skills in the uses of digital photography in their teaching.

- Access to cameras would also enable teachers to document their classroom practice for required evaluations, portfolio development, and home-school communication.

Full description of the project that includes the following sections:

A. The goal of the program or project

The goals of this project are to enable all Education students –whether they own their own equipment or not -- to:

- develop skills in digital photography to develop instructional resources,
- learn to better incorporate digital photography across the curriculum in K-12 schools, including the program's initiatives in Digital Storytelling (see related STF proposal on Macintosh/Digital Audio-Video Production for Classroom Teachers)
- document classroom practice for formal evaluation, portfolio development, and home-school communication.

B. A description of the program and how it will benefit the student body

K-12 teacher interns must become adept at digital imagery, yet many students cannot afford their own equipment. Access to equipment in the schools in which they do their field placements is typically very limited. With over 100 interns enrolled in the Teacher Certification program each quarter (and with internship schedules that often keep them off campus for days), Teacher Certification students cannot readily access Media Center equipment when they need it.

Purchase of equipment would allow for more sustained and systematic use of digital photography in the everyday practice of Teacher Certification interns, as well as more advanced preparation in digital multi-media projects for graduate students.

C. Specific information about the equipment and/or services being requested

All prices from ButterflyPhoto.com, as per Dave Snyder in UWB Media Center

<u>Description</u>	<u>Cost per system</u>	<u>Quantity</u>	<u>Total</u>
--------------------	------------------------	-----------------	--------------

Sony Power-shot Digital A630 8mp Camera	\$215.00	5	5	\$1,075.00	Accessory
Kit	\$49.95	5		249.75	
Tax/S&H					
249.50					
			Total Cost:	1574.25	

D. How the project will be implemented and by whom

Faculty will coordinate assignments requiring digital photography and will develop systems for prioritizing the use of the equipment among cohort members for their own courses.
