- This is a suggested schedule of courses based on degree requirements. Actual degree plan may differ depending on course of study selected, number of starting credits, or starting admission point. Please track your degree audit.
- This guide is not a substitute for academic advising or degree audit review ([degree audit states all requirements for degree completion](#)). Contact your academic advisor with questions about scheduling, unique interests, or degree requirements.
- Applicants who are generally competitive to Chemistry will have the following: 1. All prerequisites completed or 1-2 in progress by time of review, 2. A 3.0 grade or higher in each prerequisite, 3. Cumulative GPA of 3.0 or higher, 4. A positive grade trend with few to no repeats. However, students who satisfactorily meet prerequisites are typically, not always, offered admissions into chemistry.
